**STANDARD POSITION DESCRIPTION
NATIONAL PARK SERVICE
FIRE MANAGEMENT PROGRAM**

CLASSIFICATION TITLE: FORESTRY TECHNICIAN

SERIES AND GRADE: GS-462-05

Introduction

This position is located in a National Park Service organization. The primary responsibilities of this position are to serve as a prescribed fire technician in the implementation and monitoring of wildland and prescribed fire-burning projects.

Major Duties

Fire Control Duties

This is a rigorous position with incumbent performing the following duties, which are directly connected with the control and extinguishment of fires for over 50% of the time:

Assists in all aspects of wildland and prescribed fire operations including preparation, ignition, monitoring, holding, mop-up, and rehabilitation. Collects fire weather data, fuel and/or soil moisture samples, maps projects, and maintains appropriate records, including fire reports.

Serves as a Prescribed Fire Monitor, collecting and evaluating weather, fuels, topography, and fire behavior data for prescribed and wildland fires. Prepares maps of fire perimeter to report fire progress over time. Observes and reports smoke transport and potential impacts of fire on resources and safety of personnel. Evaluates observed conditions and problems, makes preliminary determinations on the cause of problems noted, and provides results to higher-level specialists for analysis.

Serves as Ignition Specialist, Field Observer, Squad Boss, or as a holding or ignition crew member on wildland and prescribed fires, as assigned.

Operates four-wheel drive pickup trucks and fire engines, portable pumps, chain saws, and other common fire equipment.

Performs tasks to control and extinguish wildfires as needed.

Additional Duties

When not performing fire control duties, and for less than 40% of the time:

Assists in preparation of portions of prescribed fire burn plans. This includes literature research, descriptions of methods, preparation of graphs and charts, and summary of findings.

Establishes and monitors index plots to assess fire effects in a variety of fuel/vegetation types.

Assists in identification of grasses, herbs, shrubs, and trees. Assists in preparing herbarium specimens and records habitat and plant association data.

Uses computer models to store, update, and analyze fire behavior and other monitoring data.

May perform hazard fuel reduction projects, which entails mechanical removal of vegetation through use of chainsaws, etc. May assist in park emergency operations.

May clean, maintain, recondition, and store fire fighting tools and equipment. Inventories fire supplies and equipment.

May be assigned to other resource management activities such as recreation, erosion control, exotic species removal, fuel inventory, cleaning outdoor recreational facilities, etc.

Other Significant Facts

This is a Testing Designated Position (TDP) under the Department of the Interior Drug-free Workplace Program.

This position is for physically vigorous individuals.

Factor 1. Knowledge Required by the Position

Level 1-4, 550 points

Knowledge of suppression methods used in containment and control of wildland fires.

Knowledge of fire behavior at the S-290 Intermediate Fire Behavior level or higher to communicate observations and to determine where to locate fire control line.

Knowledge of fire weather monitoring procedures and accuracy requirements. Knowledge of collection and recording procedures for fire behavior, fire effects, and weather data. Ability to become a certified Prescribed Fire Monitor (RXFM).

Knowledge of NPS fire management policies, cultural resource management practices, NPS fire management plans, fire monitoring procedures, fire effects, and ignition techniques to support, understand, and relate results of wildland fires and prescribed burns projects to the broader natural resource function.

Knowledge of safe use of common fire tools and equipment such as Pulaski shovel, McLeod, chainsaws, pumps, etc., to build fire line and control wildland and prescribed fires.

Ability to operate four-wheel drive pickup trucks and fire engines.

Technical knowledge of firefighting operations such as fire engine, pumps, and handcrews.

Ability to use computers and telecommunications equipment for data entry, word processing, and report writing.

Ability to use compass, topographic maps and aerial photographs to safely and efficiently locate and access fires and monitoring plots.

Basic knowledge of standard procedures used in fuel inventories and sampling.

Ability to communicate orally and in writing to relay instructions and information and produce reports of findings and observations.

Knowledge of plant classification techniques.

Knowledge of personal safety techniques to prevent injury to self and others.

Knowledge of fire terminology and use of radios to communicate with other crew members.

Factor 2. Supervisory Controls

Level 2-2, 125 points

The supervisor assigns work, provides training and outlines objectives. Once made, the incumbent is relied upon to independently carry out assignments based on past experience. When unfamiliar field conditions or situations are encountered, a higher graded employee is contacted to provide guidance or resolution. The supervisor assures that tasks completed, data collected, and the methods used are technically accurate and in compliance with instructions and established procedures.

Factor 3. Guidelines

Level 3-2, 125 points

Guidelines typically are in the form of oral and written instructions and training prior to wildland fire, prescribed fire or suppression activities (e.g., National Wildfire Coordinating Group (NWCG) Fireline Handbook, etc.). Established plans and techniques (e.g., parks' Natural Resources Management Plans, Fire Management Plans, and an adapted version of the NPS Western Region's Wildland Fire Monitoring Handbook, scientific literature, etc.) are used to conduct fire control and other resource monitoring work. When existing written or oral instructions do not apply, the problem is referred to supervisor. Since every possible situation cannot be anticipated and covered in training, the employee must use independent judgment in applying guides, especially in situations where the supervisor is not available for consultation before action is required. Guides such as safety regulations must be applied.

Factor 4. Complexity

Level 4-2, 75 points

Projects include completing a variety of tasks on prescribed burns and wildland fires, and fire weather and effects data collection. The work involves skillful application of a variety of complicated fire monitoring and prescribed fire ignition and holding techniques, and use of equipment and tools. Decisions as to what must be done depend, to a considerable degree, on the employee's analysis of the situation and issues involved, with the selected course of action chosen from a variety of options. Incumbent is expected to apply and modify guidelines and protocols from previous experience.

Factor 5. Scope and Effect

Level 5-2, 75 points

The work involves skillful application of a variety of prescribed fire control and monitoring techniques and use of equipment and tools. The work contributes to the effective implementation of the Park's and the National Park Service's Fire Management Program. Duties have a significant impact on the long-term fire restoration component of the Park's Fire

Management Program, in that prescribed fire projects and data collected enables managers to make decisions about ecosystem management and to evaluate program success.

Factors 6 and 7 (combined). Personal and Purpose of Contacts Level 2/A, 45 points

Primary contacts are with co-workers, personnel from fire and resource management and other divisions within the park, fire and resource management personnel from other parks, and personnel from other Federal and State land management agencies. Contacts are made in a moderately structured setting. The purposes of contacts are to exchange information, and to clarify and gather information.

Factor 8. Physical Demands

Level 8-3, 50 points

Arduous: Duties involve field-work requiring above average physical performance, endurance and superior conditioning. Work requires prolonged standing, walking over uneven ground, and recurring bending, reaching, lifting and carrying of items weighing over 50 pounds and shared lifting and carrying of heavier items, and similar strenuous activities requiring at least average agility and dexterity.

Duties include demands for strenuous activities in emergencies under adverse environmental conditions and over extended periods of time. Operation of some specialized fire equipment can place extended physical stress on incumbent during fire activities.

The duties of this position requires the incumbent to meet the physical fitness test for arduous positions.

Factor 9. Work Environment

Level 9-3, 50 points

The work is primarily performed outdoors in forest and desert environments in steep terrain where surfaces may be extremely uneven, rocky, or covered by vegetation. Temperatures commonly exceed 100 degrees F and fall below freezing. Risks include smoke inhalation, fire entrapment, snake or insect bites and stings, exposure to excessive machinery noise, and falling and rolling material. Personnel must adjust and cope with exposure to weather elements, dust and smoke, poor bivouac and eating situations under an unpredictable set of circumstances. Incumbent may be required to live in backcountry camps for extended periods of time. The hazardous nature of the job requires that protective clothing be worn (hard hats, gloves, boot, flame resistant clothing and other personal protective equipment). Work may require travel by light fixed-wing or rotor-wing aircraft.

Processing and analysis of data are done primarily in an office setting, this is done less than 10% of the time.

CLASSIFICATION EVALUATION

Classification Allocation: Forestry Technician, GS-462-05

Position Classification Standards Used: Forestry Technician, GS-462, TS-111, 12/91; Fire Protection and Prevention Series, GS-081, 09/91; Grade Level Guide for Aid and Technical Work in the Biological Sciences, GS-400, (TS-111, 12/91)

Background

This position description is established as a standard position description for use by the National Park Service Fire Management Program and is appropriate for rigorous positions in Parks where the **PRIMARY PURPOSE** is to serve as a crewmember in the implementation and monitoring of wildland and prescribed burn projects. These duties are directly connected with the control and extinguishment of fires. This position is for physically vigorous individuals and incumbents must meet the physical fitness standards for arduous positions.

Title and Series Determination

The Forestry Technician, GS-462 series (TS-111, 12/91) covers positions that primarily require a practical knowledge of the methods and techniques of forestry and other biologically based resource management fields. Forestry technicians provide practical technical support in the scientific management, protection, and development of forest resources. Forestry Technicians are most commonly found in first level units and are principally concerned with performing work supporting the implementation of projects and program goals. Since the majority of wildland and prescribed fire projects are carried out in forested areas, the GS-462 is the most appropriate series for this position. Furthermore, GS-0081, Fire Protection and Prevention Series (TS-108, 9/91), states that positions that include fire control, suppression, and related duties incident to forestry management work should be classified to the Forestry Technician Series.

In accordance with the titling instructions of the Forestry Technician standard (GS-462), Forestry Technician is the authorized title for this position. Therefore, the proper title and series are Forestry Technician, GS-462.

Grade Level Determination

The Grade Level Guide for Aid and Technical Work in the Biological Sciences, GS-400, (TS-111, 12/91), which is in the FES format, will be used to evaluate this position.

Evaluation Factors	Level Assigned	Points Assigned
1. Knowledge Required by the Position	1-4	550
Comments: Incumbent applies knowledge of the technical methods and procedures of wildland fire control. Monitors and carries out a variety of technical duties (e.g., prescribed and wildland fire preparation, ignition, monitoring, holding, mop- up, and rehabilitation); collects weather, fuels, topography and fire behavior data, etc., common to the specialty area of wildland fire.		
2. Supervisory Controls	2-2	125

Comments: Supervisor provides instructions on recurring assignments, and provides additional specific guidance and reference sources for new or difficult assignments; incumbent performs recurring assignments independently, and refers situations not covered by instructions or precedents to supervisor; work and methods evaluated for accuracy and adequacy.		
3. Guidelines	3-2	125
Comments: Incumbent must choose the most appropriate from several guidelines; uses judgment to handle aspects of work not completely covered by guidelines.		
4. Complexity	4-2	75
Comments: Work involves performing a variety of related technical tasks of limited scope or difficulty, e.g., performs a variety of technical duties in implementing prescribed and wildland fire plans. The incumbent chooses the correct technique, guideline, or procedure based on past experience.		
5. Scope and Effect	5-2	75
Comments: Work involves the execution of specific procedures, and techniques which differ with each project's fuel type, weather conditions, and topography; execution of bum plans and data collected affects the accuracy, reliability, or acceptability of the Park's fire restoration component of the fire management program.		
6. Personal Contacts	2	--
Comments: Contacts are with co-workers, personnel from fire and resource management and other divisions within the home park, fire and resource management personnel of other parks, other Federal and State land management agencies in a moderately structured setting.		
7. Purpose of Contacts	A	45
Comments: Exchange, clarify and gather information.		
8. Physical Demands	8-3	50
Comments: This is a rigorous field position. The work requires regular and recurring protracted period of considerable and strenuous physical exertion. Must meet Arduous physical standards.		
9. Work Environment	9-3	50
Comments: Work is performed in steep terrain, uneven surfaces, in extreme weather conditions with exposure to heat, smoke, and insects. Work requires protective clothing.		
Total Points: 1095		
Final Grade Allocation: GS-05		

(GS-5 range is 855 - 1100)

Conclusion

The total points allocated to this position equal 1095 which falls within the GS-5 range of 855 - 1100. The appropriate classification of this position is Forestry Technician, GS-462-05.
